Professional Experience

● Data Entry & Data Processing Specialist

Late 2024 - Present

Independent / Personal Projects

- Organized structured project, contact, portfolio, and operational records across multiple digital products.
- Cleaned and validated links, metadata, feature lists, technology stacks, and resume content for public-facing use.
- Prepared consistent JSON datasets for automated HTML and PDF generation workflows.
- Reviewed generated web and document outputs to catch formatting, spelling, encoding, and data consistency issues.
- Applied spreadsheet-style thinking to sort, group, normalize, and present information clearly.
- Maintained accurate reusable records for profiles, projects, skills, contact details, and portfolio references.
